

TUSHAR SOHAL

Backend Developer | Node.js & Python
tusharsohal20@gmail.com | +91-7827115042 | Portfolio

Professional Summary

Backend Developer with 1+ year of experience building secure, scalable APIs for defence and enterprise systems. Skilled in Node.js, FastAPI, PostgreSQL, JWT authentication, RBAC, and Redis caching. Focused on performance optimization and production-ready backend architecture.

Technical Skills

Backend: Node.js, FastAPI, REST APIs, JWT, Refresh Tokens, RBAC

Databases: PostgreSQL, MongoDB, MySQL, SQLite (Schema Design, Query Optimization, Joins)

Caching & Performance: Redis, API Optimization

Frontend: React.js, Angular, Next.js

Languages: JavaScript, Python, SQL

Tools: Git, CI/CD, Postman, Swagger/OpenAPI, Render, Vercel

Experience

Web Developer — UPSALA

Sep 2025 – Present

Angular, Next.js, FastAPI, PostgreSQL

- Built backend APIs for a defence-grade intelligence platform supporting 800+ users across hierarchical units.
- Designed JWT-based authentication and implemented RBAC for multi-level user permissions.
- Integrated internal APIs for dashboards, reports, and map-based data visualization.
- Optimized PostgreSQL queries using joins and indexing, improving API performance.
- Improved data fetching for hierarchical structures, reducing latency in large datasets.
- Implemented Redis caching and optimized authentication using JWT with refresh tokens.
- Ensured secure data handling following defence-grade security practices.

Projects

The Kapda Company — Customizable E-Commerce Platform

kapdaco.vercel.app

React.js, Node.js, Express.js

- Built a multi-role e-commerce platform (User, Admin, Designer, Seller).
- Implemented RBAC for secure multi-user workflows.
- Developed REST APIs for product, order, and user management.
- Integrated Razorpay payment gateway for secure transactions.
- Implemented dynamic product customization features.

Library Management System — Desktop Application

Electron.js, React.js, Node.js, SQLite

- Built a desktop system to automate book issuance, returns, and fine calculation.
- Implemented rule-based fine system charging per-day penalties.
- Enabled Excel import/export for efficient data handling.
- Reduced manual workload by ~85% through automation.

School Website & Management Platform

lordkrishnaconventschool.com

React.js, Node.js, Express.js, MongoDB

- Built and deployed a platform serving 1,000+ users with role-based access.
- Developed backend APIs for events, student data, and content delivery.
- Built form systems for career applications, enquiries, and complaints.
- Optimized API calls and image-heavy gallery performance.

Education

MCA — Guru Gobind Singh Indraprastha University

2025

GPA: 8.3 / 10

BCA — Guru Gobind Singh Indraprastha University

2022

GPA: 8.4 / 10

Certifications

Frontend Development using React — Coursera (2025)

Web Development Fundamentals — IBM SkillsBuild (2024)
